PRESS RELEASE

Newer is Better

Solid Route Accounting Version 9.0 Coming Soon

PRINCE ALBERT – SEPTEMBER 24, 2009 – Solid Route Accounting's newest software version is expected to be released in the coming months. Version 9.0 will include the features and benefits of Solid Route Accounting's current version, but will also incorporate:

- Windows Mobile Device Support
- Special Pricing
- Customer Discounts
- Signature Review & Reprint
- QuickBooks® UK Edition Support (US and CDN versions also supported)
- Variable Date Format
- Variable Currency Symbol

The released software will be compatible with all Solid Route Accounting editions, including those for QuickBooks® Pro, Microsoft® Dynamics GP, and SDC Dynamics 3i.

“Our team is excited about the new release,” says Bryan Shier, Director of Client Services. “Now that we support both Windows Mobile and Palm OS Mobile operating systems, our clients will enjoy the option of mixing and matching systems to best suit their needs and available hardware. This, coupled with the new and existing product features of Solid Route Accounting, will simply extend the ability of our clients so they can effectively service their customers while continuing to save time and increase profits.”
