

## Solid MultiConnect™

*Why choose **Solid MultiConnect™** to handle your business system?*

*Because it gives you the competitive advantage.*

When running a competitive business, you have to be one step ahead. Solid MultiConnect™ gives you the competitive advantage by automatically managing the flow of information between your office system and any handheld computer, so you don't have to. All transactions created by Solid Sales Pro™ on the handheld computer are uploaded to your office system via Solid MultiConnect for further processing. Solid MultiConnect enhances the efficiency of transactions as information is processed with speed and accuracy.

## Connectivity

- Unattended connection handling; it's like watching paint dry
- Handle multiple concurrent sessions, via any combination of IP, modem, or serial sessions
- Separate connection logs are maintained for each mobile unit
- Local serial communication port support
- Modem and multi-port card support
- TCP/IP support for network or Internet connectivity
- Data compression is used resulting in very fast connection times

## Automated Information Exchange

- Customer routing groups including name, address, phone numbers, contact information, notes, account balance, credit limit, tax status, and purchase order requirements
- Inventory items including product code, bar-code, description, list, cost and wholesale prices, discounts, environmental charges and tax information
- Stock transfers containing inventory quantities to be loaded to the truck or location
- System configuration - passwords, user IDs, configurations
- Programming - new programming is automatically sent to the hand held
- New route sales invoices, credits/returns and amounts received on account
- Inventory counts of on-hand quantities for the warehouse or truck
- Outgoing stock transfers which have been created on the mobile
- Settlement of daily handheld sales transactions

## Reporting

- Connection results - a complete log of all connection results can be viewed or printed; includes new transactions and new customers.
- Error Conditions - Error conditions regarding duplicated or incomplete transactions or customer records are automatically reported and managed

In this electronic world we live in, much of today's business information exchange takes place globally and invisibly. The seamless and timely flow of information is essential to running a competitive business and advantageous to both internal and external customers. As such, Solid MultiConnect ensures your business information is instantaneously available so you can be one step ahead of your competition.
